Procurement Engineer

OVERVIEW

Reporting to the Purchasing Manager, the Procurement Engineer (Sourcing Executive) is responsible for overseeing daily procurement activities including sourcing, reviewing, qualifying, and selecting cost effective materials required for the company's operations. This role plays a key part in vendor management, price negotiation, and ensuring timely delivery of quality materials within budget.

The Procurement Engineer will collaborate closely with the purchasing team and functional departments to monitor supplier performance, implement subcontractor control processes, and drive cost reduction initiatives.

KEY RESPONSIBILITIES

- Support the Purchasing Manager in sourcing and evaluating new vendors.
- Negotiate with suppliers to achieve cost efficient procurement within agreed targets.
- Track and monitor deliveries to ensure compliance with specifications and schedules.
- Conduct periodic vendor reviews and recommend improvement actions.
- Implement subcontractor control and tracking processes.
- Lead cost reduction projects with regular reporting.

REQUIREMENTS

- Diploma or Degree in Engineering (Mechanical, Mechatronic, or Chemical preferred).
- 1–2 years of experience in strategic sourcing or procurement.
- Computer literate with strong teamwork and problem solving skills.
- Proactive, detail oriented, and able to work with urgency when handling issues.
