Spray Painting Technician

OVERVIEW

We are seeking a Spray-Painting Technician to perform and monitor spray painting operations, ensuring high-quality finishes on plastic and metal components. The role requires expertise in paint preparation and application, knowledge of manufacturing processes, and familiarity with testing methods to maintain product standards.

KEY RESPONSIBILITIES

- Execute spray painting operations and monitor quality.
- Apply PU, UV, acrylic, and water-based paints with proper preparation.
- Ensure compliance with quality requirements for plastic parts (PP, ABS, Nylon).
- Conduct wet and dry paint testing (adhesion, UV, humidity, viscosity, thickness, etc.).
- Operate and maintain paint shop equipment, including booths, ovens, conveyors, and robotic systems.
- Maintain environmental conditions (temperature, humidity) in paint booths.
- Perform scheduled equipment maintenance and support productivity improvement systems.
- Ad hoc tasks as assigned by the department head.

REQUIREMENTS

- Diploma in Chemical Engineering or B.Sc. in Chemistry (experience in PU paint preparation preferred).
- Minimum 3–4 years of relevant experience in plastic paint shops.
- Good health, not allergic or sensitive to painting materials.
- Knowledge of ISO 9001:2015, EMS 14001, OHSAS 18001.
- Familiarity with Kaizen, 5S, and Lean Manufacturing practices.
- Understanding of robotics, PLC, and machine programming.
